Dataset discovery
- quality driven dataset discovery & retrieval
- collaborative knowledge bases
- evolution of Web data
- trust and provenance in the Web of Data
(UOB, SOTON, UJMS)

Data management
- consolidation, integration, and cleaning of data
- dataset profiling, summarization, and ranking
(UOB, ODI)

AI & NLP Approaches
- translation of NL questions into queries
- spoken question recognition and interpretation
- data-driven text generation
(UOB, Fraunhofer, SOTON)

Human–data Interaction
- interactive interlingual QA
- challenges connected to data search and use (ODI)

Core Architecture (UJMS, Fraunhofer)

UOB: University of Bonn, UJMS: Université Jean Monnet Saint-Étienne, ODI: Open Data Institute, SOTOM: University of Southampton
