Dataset discovery	**Data management**	**AI & NLP Approaches**	**Human–data Interaction**
- quality driven dataset discovery & retrieval - collaborative knowledge bases - evolution of Web data - trust and provenance in the Web of Data (UOB, SOTON, UJMS)	- consolidation, integration, and cleaning of data - dataset profiling, summarization, and ranking (UOB, ODI)	- translation of NL questions into queries - spoken question recognition and interpretation - data-driven text generation (UOB, Fraunhofer, SOTON)	- interactive interlingual QA - challenges connected to data search and use (ODI)

Core Architecture (UJMS, Fraunhofer)

UOB: University of Bonn, UJMS: Université Jean Monnet Saint-Étienne, ODI: Open Data Institute, SOTOM: University of Southampton
